

All work done according to standard protocols unless otherwise indicated

August, 2014

Monday, 4th

- RTH K112808 mutagenesis, phosphorylate primer, PCR, DpnI

Tuesday, 5th

- Transformation K112808-IN

Wednesday, 6th

- K112808 plates grew, picked

Thursday, 7th

- Miniprep K112808 in, sent for sequencing

Tuesday, 12th

- K112808in RTH Started again

Wednesday, 13th

- K112808in mutagenesis transformed

Thursday, 14th

- Picked the K112808 plates

Friday, 15th

- Miniprep, gel confirmed and sent for sequencing

Saturday, 16th

- K112808in and K808000 assembly started, digest, gel, gel extraction and ligation

Sunday, 17th

- Ligation transformed

Monday, 18th

- Plates grew, picked and grown overnight,

Tuesday, 19th

- Miniprep, gel looked good sent for sequencing

Saturday, 30th

- K808000+lyse-in and K808000 + lyse co transformed with RNA-OUT
